In this study, samples of Hymenoptera were collected on the Pulley Oak leaves in Pulley Oak Nature Protection Area in Yukarıgökçe, Eğirdir-Isparta, Turkey. It was determined as Chrysocharis gemma (Walker, 1839) (Hymenoptera: Eulophidae), when the collected samples are examined. Moreover, the species was found to be a new record for Turkey fauna in this study. Morphological characters, measurements and taxonomic characters for the species were given.
