As a result of globalization, there came into being a medium of competition, rapid modification, diversities in scientific and technical areas have resulted in a demand for a qualified work power that has ever been increasing; thus, it has been necessary to have a Professional and vocational training that will cover a quality and contemporary technology. In this regard, vocational or junior colleges are trying to respond to expectation about these points by having the students gain the knowledge and skills required by certain vocation. In this study, comparison of students who are entitled to enroll as a result of their points of university entrance examination and those students who are given the right to make their enrollment directly to Isparta Junior College in accordance with the 4702 law has been made. It has been observed that the former students have been more successful than the latter ones and the problems have been put forward and their solution have been suggested.

Key words: Vocational training and education, direct enrollment, students success.
